# HIDECURVE

Bicolor artificial hedge, with curved leaves for greater realism

Two-tone artificial hedge with 38 rods/ml, 50% recycled. It offers an aesthetic and practical solution for delimiting your garden or terrace. Create an effective visual barrier while adding a touch of greenery and nature to your outdoor space.

## Benefits

Artificial hedge developed and manufactured by the Catral Group in our production plants. Thanks to the work carried out by our R&D department, we have created the first hedge with a realistic cut to imitate natural hedges as closely as possible. The result is a more realistic appearance and greater screening effect.

## Characteristics

Material : PVC + green plastic-coated wire  
Finish: Folded ends  
Height : Real and exact height  
Number of rods : 38 rods per metre  
Weight : +/-1kg/m<sup>2</sup>  
Colours : Light green - Dark green  
Sheet thickness : +/- 60 microns  
Recycled material : +/-50%  
Form : Curve  
Packaging : PP mesh  
UV treatment : Yes  
Patent pending
