

GREEN SINTRA 20 mm

20mm Artificial Grass: A Sustainable, Affordable, and Highly Appealing Option

20mm artificial grass is emerging as an increasingly popular alternative to traditional natural grass lawns. This option offers a number of advantages, making it a sustainable, affordable, and aesthetically pleasing choice for a variety of spaces.

Benefits

20mm artificial grass offers a sustainable and aesthetically pleasing alternative to traditional natural lawn options. Its short length makes it an ideal choice for high-traffic areas such as balconies, terraces, and patios, as it is wear-resistant and requires minimal maintenance. If you are looking for a durable, low-maintenance, and aesthetically pleasing lawn solution, 20mm artificial grass is an excellent option.

Characteristics

SPECIFIC FEATURES:

Fiber material: PE + PP
Height: 20 mm
DTEX: 8.000 (± 3%)
Stitches m²: 15.750 (± 100)
Fiber shape: C-SHAPE
Total weight: g/m²: 1.287
Transversal stitches in 10 cm : 15/10
Colour: 2 green + 2 brown
Anti UV stabilization
Warranty: 8 years

MAINTENANCE TIPS:

- Once the grass is unrolled, let it rest for at least 24 hours before installing it.
- Once installed, brush the grass from time to time, depending on how it is used.
- For a better result, use a special brush for artificial grass such as the Nortene BRUSHY model.
- To remove dust, sand or other small debris present in the hair, a conventional vacuum cleaner can be used.
- Apply the CLEAN cleaner and Nortene FRAGRANCE to give it an unbeatable appearance.
- It is not recommended to install artificial grass near glass and / or metal surfaces

NORTENE®

exposed to direct sunlight.
- The reflection of the sun on the glass causes a very high temperature and can cause burns to the blades of grass due to the magnifying effect on the grass.
